

Why choose Sarajevo Medical School?

- ✓ Sarajevo Medical School offers a programme with focus on practical work from the 1st year of studies (done at the Emergency Unit in Sarajevo, KCUS, primary care facilities in Sarajevo).
- ✓ Talented students are involved in research projects and they participate in local and international conferences.
- ✓ The programme is focused on the knowledge that is necessary to continue education internationally. Students are prepared to take the USEMLE test (US test for Residency programme in the USA).
- ✓ Additional consultation sessions and help sessions for students in need for extra help are available.
- ✓ Lab facilities are open daily from 8 AM until 9 PM and during weekends and students have access to them.
- ✓ Following modernized approach in education, a lot of simulation programmes are used during lectures and lab work.
- ✓ 3rd year students are completing their Pathology practice entirely at KCUS, working with a different pathological samples and doing post mortem under supervision.
- ✓ International guest speakers and lectures are actively involved in the programme.
- ✓ Working in small lab groups is preferred for better focus on practical work and individual learning.
